

BENITO N.

FULLSTACK DEVELOPER ANGULAR/JAVA EE

8 YEARS OF EXPERIENCE

- » PROJECT MANAGEMENT
- » APPLICATION DEVELOPMENT
- » API DEVELOPMENT
- » MICROSERVICES ARCHITECTURE
- » CLOUD MIGRATION
- » TEAM COORDINATION
- » QUALITY ASSURANCE
- » AGILE METHODOLOGIES
- » ORGANIZATION / COMMITMENT / TEAMWORK / LEADERSHIP /
MOTIVATION / DETERMINATION

8 years of experience in design and development of web applications, and proficient in modern frameworks and environments. Organized, committed and unifying, I know how to take initiative and support teams towards project success.

SKILLS

	Languages	CSS / HTML / Java / Maven / Typescript / Javascript
	Framework / API / Webservices / CMS	Angular / Hibernate / Junit / Spring Boot / React JS / .Net core / Activiti
	Storage / Databases / BI	MySQL / Oracle / PostgreSQL / MongoDB
	DevOps / Cloud / AI	Jenkins / Docker
	Tools / Softwares / ERP	GITHUB / Gitlab / Gradle / Keycloak
	Autres	JPA / MSSQL / SonarQube / SoapUI / Tailwind / Kubernetes / Microsoft Azure Cloud

EDUCATION

- 2017 Degree in Computer Engineering specializing in Software Engineering (mention Bien)**
2017 - 2017 / Ecole d'ingénieurs 3iL - Limoges
-
- 2017 Master in Computer Science specializing in Mobile Application Development (mention Bien)**
-

2017 - 2017 / Université du Québec à Chicoutimi –
Canada

LANGUAGES

French

Native speaker

English

B2: independent - advanced

Spanish

A1: elementary - introductory

CERTIFICATIONS

2025 **Certified SAFe® 4 Agilist**

PROFESSIONAL EXPERIENCE

	Developer Full Stack	
	Period	2023 – 2025 (30 months)
	Client	AIR FRANCE (VIA HAAGEM/SOPRA STERIA)
	Project	Developer Full Stack
	Description	Redesign of application on the Java/Angular stack – development from scratch of a new application
	Tasks	• Rewriting the Traffic application using Spring Boot 3 / Angular 18; • Development of REST APIs to consume ATPCO APIs; • Implementation of integration and unit tests within the scope; • NGDC migration to the Azure cloud using AKS technology; • Participation in upcoming applications within the PRM4.0 scope.
	Tools & technologies	Java (17, 21), Spring Boot (2,3), Maven, Angular (15-18), PostgreSQL, Oracle, Como, Microsoft Azure Cloud, HTML, CSS, Tailwind, TypeScript, Spring Batch, GitHub, Hibernate, JPA, Junit.

	Developer Backend	
	Period	2022 – 2023 (10 months)
	Client	VMANE&FILS (VIA INNOVA SOLUTIONS)
	Project	Developer Backend
	Description	Implementation of a micro-service for a client and the technical ecosystem in migration
	Tasks	• Development of RESTful API for the PLMAPI micro-service providing read information for Unilever regarding fragrance and perfume creation; • Development of unit tests and integration tests for all APIs using Mockito, Junit4; • Implementation of continuous integration (CI/CD) with GitLab CI; • Upskilling team members on Spring Boot, Hibernate, JPA; • Implementation of back-office security with Spring Security, Keycloak; • Improvement of code quality with SonarQube.
	Tools & technologies	Java 11, Spring Boot (2), Maven, MSSQL, Hibernate, JPA, Keycloak, Sonar, GitLab, Junit.

	Developer FullStack	
	Period	2020 – 2022 (25 months)

	Client	MONACO TELECOM (VIA INNOVA SOLUTIONS)
	Project	Developer FullStack
	Description	Providing REST APIs for the TecREP application + agile support as Scrum Master
	Tasks	• Development of RESTful APIs using Test RestAssured and unit tests; • Acting as Scrum Master for the project and a related project; • Development of several interconnected micro-services for the TECREP project (equipment, resources, services, addresses) eligible for fiber, including backend with Java Spring, Maven, JPA and frontend using WorkFlow Engine (React for front end and Spring Boot, Activiti for backend); • Development on the Swiss version (SALT) for fiber eligibility involving multiple functionally grouped micro-services, utilizing Spring, Maven, JPA, soapUI, Sonar for quality, and Jenkins for continuous integration.
	Tools & technologies	Java (11), Spring Boot (2), Maven, MySQL, Hibernate, JPA, Sonar, GitLab, Junit, Activiti, React JS, WorkFlow Engine, SoapUi, Jenkins, HTML, CSS.

	Developer Fullstack	
	Period	2019 - 2020 (6 months)
	Client	ORANGE BUSINESS SERVICE (VIA EXTIA)
	Project	Developer Fullstack
	Description	Redesign of the UI for the analytical data of an OBS application
	Tasks	• Development on an Angular and .NET Core project using agile methodology; • Participation in updating the application framework (Front End: Angular 8 and Back End: .NET Core optionally); • Active involvement in technical design of the project, including authentication system and component selection for heavy data loading; • Mentoring the future team (2 people) to build skills in Angular technologies; • Participation in the implementation of PGCL; • Ensuring project quality; • Implementation of deployment and continuous integration with Azure Devops.
	Tools & technologies	Angular 8, .NET Core, GitLab, HTML, CSS, JavaScript, Scrum, MSSQL.

Developer FullStack		
	Period	2018 – 2019 (19 months)
	Client	ORANGE WHOLESALE FRANCE (VIA SOPRA STERIA)
	Project	Developer FullStack
	Description	Design and development of an application from scratch (VADOR) for fiber deployment to end customers and businesses (B2C and B2B)
	Tasks	• Active participation in the technical design of the project; • Contribution to the implementation of the application framework (Front End: Angular and Back End: SpringBoot); • Implementation of a database audit and adherence to best practices; • Development on an Angular and SpringBoot project using agile methodology; • Active involvement in the TMA aspect of the application (bug fixing and evolution); • Mentoring team members on Angular and SpringBoot technologies; • Participation in the implementation of SonarQube for product quality; • Participation in the implementation of PGCL; • Ensuring an agile framework for the project; • Facilitating Scrum rituals for the team; • Leading daily meetings, retrospectives, reviews, and sprint planning at each iteration.
	Tools & technologies	Java 8, Spring Boot 2, Maven, Angular, MySQL, HTML, CSS, TypeScript, GitLab, Hibernate, JPA, Junit.

Android Developer		
	Period	2017 – 2018 (4 months)
	Client	LA POSTE (VIA SOPRA STERIA)
	Project	Android Developer
	Description	Design and development support for the eNova Mobilité application (bug fixes and enhancements)
	Tasks	• Development on an Android project using agile methodology; • Active involvement in the TMA aspect of the eNova Mobilité application (bug fixes and enhancements); • Self-training on the Android programming language (Java); • Learning the fundamentals of Android operation; • Writing functional specification documents.
	Tools & technologies	Android, Gradle, HTML, CSS, JavaScript, GitLab.
